I can only see one content section, where are the others?

This refers to Moodle from July 2018 onwards (3.4)

I can only see one content section, where are the others?

There are a couple of features to help you avoid scrolling through the content section down the centre. One of these is the list of module sections in the Hamburger menu

on the top right.

Here is an example:

- Click on the title of a section to go straight to that section.

Some modules have a format in which all the sections are COLLAPSED initially.

You may see just the title or a description of the section as well.

Here is an example
Using the section toggle icon in Collapsed Topics format modules

Some modules have a format in which all the sections are COLLAPSED initially.

- There is an icon at the top of the list of sections which can be clicked on to either expand (open) or contract (close) all the sections.

- This can also be done by clicking on the section title

- There are also icons above each section to open or close it

Within any resource or activity in Moodle there are links to previous and next items

You can also “jump to” any of the other activities or resources in the course.

Here is an example:
2.1 Welcome to the University of Nottingham Libraries (video)

2.3 Start your resource discovery journey here!
