Block settings explained

Moodle Help & Support

Block settings explained

You may want to amend the settings of a block to make it always appear in a certain place for instance or to show on every page not just the main module page. Below is a screen shot of the settings for the People block (they should look similar to other blocks apart from RSS feeds and HTML).

1. In your module click on the Turn editing on icon (top right)
2. In the relevant block click the cog wheel and select Configure [Name of] block

---

Configuring a People block

**Where this block appears**

<table>
<thead>
<tr>
<th>Original block location</th>
<th>Module: Key Moodle Basics Hub (Library, Research and Resources)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Display on page types</td>
<td>Any type of module main page</td>
</tr>
<tr>
<td>Default region</td>
<td>Right</td>
</tr>
<tr>
<td>Default weight</td>
<td>9</td>
</tr>
</tbody>
</table>

**Options**

- **Any page** (changes nothing)
- **Any module page** (any page in the current module)
- **Any type of module main page** (module main page only)

**Default weight** helps move the block towards the top (-10) or bottom (10) of the block column

**Visibility**

Column and location within column for the block but only on the page you are currently on
