

# How to give a user higher level access to a particular activity or block

## Moodle Help & Support

This refers to Moodle 2.7 from July 2015 onward

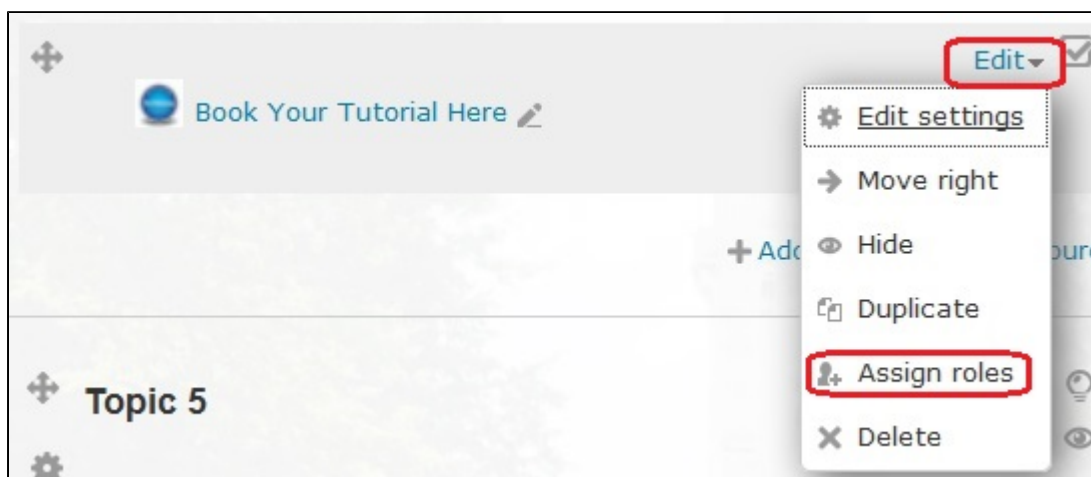

## Giving a user higher level access to an activity or block

Occasionally you may wish to give an individual who is enrolled on your module a different level of access to a particular activity or block. For example, you may wish one of your students to act as a social forum administrator or for a teaching associate to be able to print off seminar attendance sheets. This can be achieved by using the 'assign roles' process.

## Giving a user higher level access to an activity or block

Navigate to the Moodle module you want to work in. Click on the **Turn editing on** button (top right).

Go to the activity (or some blocks) you want to assign a role to and click on the **Edit** hyperlink. In the drop-down list select **Assign roles** hyperlink.

Now you must choose the level of access the individual has on this item. For security and simplicity, choose the lowest role that allows the individual to 'get the job done'. In this case we have chosen 'Editor'.

ASSIGN ROLES IN TUTORIAL BOOKING: BOOK YOUR TUTORIAL HERE ⓘ			
Please choose a role to assign			
Role	Description		Users with role
Editing Teacher	Teachers can do anything within a course, including changing the activities and grading students.		0
Editor	A role given to a member of staff that can add resources or activities (change any content), can move/reorder/indent/hide existing resources content, can configure/move blocks etc. However cannot see sensitive information in the course. E.g. Student submissions, test results or forum postings. Not allowed at Category level.		0

Next, you must choose which individuals will hold this role on this activity or block. Type their name, username or ID number into the right-hand 'search' box, select them from the 'Potential users' panel on the right, then click on 'Add'. Their names will be removed from the right and will appear on the left.
