How to send a message to groups of students or participants

Relevant to Moodle 3.6 from July 2019 onwards

Moodle Help & Support

How to send a message/email to Groups

You need to have created the Groups within your module before this will work. How to create groups and groupings

Step 1: enabling groups within your module

- Navigate to the module you want to work on
- Click the Actions Cogwheel
- Under the Groups heading change Group mode to ‘Separate groups’ or ‘Visible groups’
- From the Group mode drop-down box choose Visible groups or Separate groups. With visible groups students can see the other groups, but not interact with them. Separate groups means that students will only see their own group.
- Set Force Group mode to “Yes”
- Scroll to the bottom of the screen and click on the Save changes button.

Note: If you set Force group mode to “Yes”, the setting you choose (e.g., Visible or Separate groups) will automatically be applied to any new Activities you create (not to activities created prior to the change) therefore make sure you change the settings for each activity if you require it to be different.

Step 2 - Manual creation of a group and adding students to a group

1. In the module click the Hamburger menu
2. Click Participants
3. Click the Cogwheel Actions menu icon
4. Select Groups
5. Click the Create group button
5. Type in a group name and optional description (the description is displayed above the list of group members on the Participants page)

6. Click on the Save changes button

7. Select the group (created as in Step 1) to which you want to add participants, then click on the Add/remove users button

8. In the “Potential members” list, select the users you want to add to the group. Multiple users may be selected using the Ctrl key.

9. Click the Add button to add the users to the group

---

### Step 3 - Contacting a particular group

This process sends a message to the students through Moodle’s internal instant messaging system.

- Go to Hamburger Menu > Participants
- You can now see a list of everyone enrolled on the module.

To choose a particular group to send a message/email to:
Use the arrow next to the Search keyword or select filter box to drop down the list of filters.

Scroll down and choose the group. The list of participants will update to show only the participants relevant to this group.

Either select the individual group members (via check boxes) or **Select all** (at the bottom) and then in the **With selected users...** drop-down box choose "Send a message".

**Notes:**

This process sends a message to each student. They receive it as...

1. If they are **ONLINE** it pops up as a message and goes into their Messages folder.
2. If they are **OFFLINE** then it goes into their messages folder and is sent as an email.

How instant messages are received is governed by the individual's profile settings. See Help sheet on **How to use Moodle messaging** for more information.

There is **NO** subject or module context on the message - is it sent from one person (teacher) to another (student) so you should include the name of the module in the message to give it a context.
